

IT'S NOT ENOUGH TO JUST CHECK THE BOX

It's tempting to implement just enough identity governance to meet regulations—to check “compliance” off a one-item list. But stopping there means missing out on identity governance's biggest benefits.

Can you meet regulatory requirements?

Click on any of the items in the checklist below.

- Per-country legal requirements—in the US, these include Health Insurance Portability and Accountability Act (HIPAA), Sarbanes-Oxley (SOX) and many more
- International regulations such as the European Union's General Data Protection Regulation (GDPR)
- Industry standards like the Payment Card Industry Data Security Standard (PCI DSS)

Learn more in this [IBM white paper about GDPR compliance](#).

Are you getting the most you can from your identity governance solution?

Click on any of the items in the checklist below.

- Can you easily add, provision, certify and recertify users?
- Can line-of-business users quickly make the proper access decisions based on business activities?
- Can you smoothly remove obsolete user accounts?
- Can you manage and document users' entire data-access lifecycle?

Watch this [on-demand webinar](#) to learn more about maximizing your identity governance solution.

Is identity governance part of a unified approach?

Click on any of the items in the checklist below.

- Does your security team track data and systems access for all users?
- Can your governance tools address devices from mobile to the mainframe?
- Are you addressing segregation of duties?
- Does your governance solution facilitate communication between IT, audit and line-of-business teams?
- Are you leveraging identity governance for risk assessment?
- Does your identity solution complement the rest of your infrastructure?

IBM® Security Identity Governance and Intelligence helps tackle compliance, but it also goes much farther. Most importantly, it can unify your environment to enable secure access across the board, from mobile devices to mainframes and big-data stores—something point solutions just can't do.

Don't just check off “compliance” from your to-do list.

DO MORE.
