

# How BIG is 10 billion?

In just over five years, IBM shipped 10 billion RF SOI chips. That's kind of a big deal.

Count on IBM Microelectronics to make a big impact on the mobile world. Since 2010, we have manufactured and shipped **10 billion RF SOI chips** for the world's smartphones, tablets and more. Let's put that number into perspective.

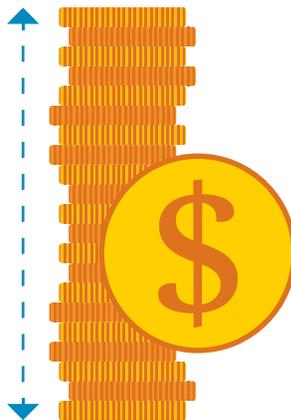

## BIG LEAP

If you travelled **10 billion miles** from Earth, you'd be at the edge of the solar system.

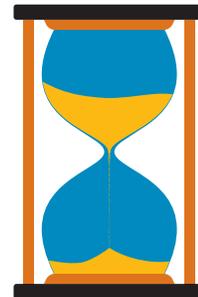

## BIG MONEY

If you stacked **10 billion pennies**, you could build a tower **9,864 miles high**, weighing **31,250 tons**.

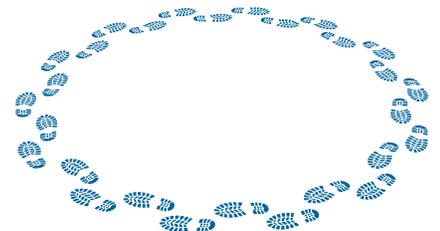

## BIG TIME

If you lived for **10 billion seconds**, you'd be more than **317 years old**.

## BIG STRIDES

If you took **10 billion steps** along the Earth's equator, you could walk around the world at least **151 times**.
